

## PURION compact system MAX

For 12 V / 24 V

50 – 60 Hz

### DESCRIPTION

Packaged in a high-quality aluminium frame, the MAX active compact system from PURION is a complete water treatment chain. The system includes a particle pre-filter with a washable nylon filter cartridge to remove suspended particles and a de-icing pre-filter to improve the performance of the UV-C system. In addition, an activated carbon filter is integrated to remove odours, improve taste and absorb carbon-based chemicals such as acetone. The last component in the water treatment chain is the UV-C system.

Furthermore, a 12V pump is included in this system, which is adjusted to the output of the UV-C system. Approx. 30 seconds after the UV-C system is started up, the pump switches on, which ensures that the UV-C lamp has sufficient supply to reach full output. The system is also equipped with a service life monitor that signals when the lamp needs to be replaced.

The system can be operated via the 12V connection with a 12V power supply unit, cigarette lighter or a photovoltaic panel. The complete system is housed in a robust aluminium frame and is already fully pre-assembled. Due to the simple integration, the complete system can be changed using the tools supplied or without tools.

### Available power supplies

- 12 V / 24 V DC with wide-voltage ballast

### Scope of delivery

- UV disinfection system
- UV lamp (14 W)
- Operating instructions

## Technical data

<b>Manufacturer</b>	PURION GmbH
<b>Type</b>	PURION Kompaktsystem MAX
<b>Throughput</b>	400 l/h Drinking water
<b>UVC transmission</b>	90% T1 cm
<b>Water temperature</b>	2°C to 40°C
<b>Reactor</b>	stainless steel 1.4571
<b>Operating pressure Max.</b>	10 bar
<b>Dimensions (LxWxH in mm)</b>	580 x 300 x 420
<b>Weight</b>	11 kg
<b>Radiator service life</b>	10.000h
<b>Number of emitters</b>	1
<b>Max. temperature</b>	40°C
<b>Housing protection</b>	IP 65
<b>Electrical connection</b>	12 V / 24 V 50Hz – 60Hz
<b>Power</b>	14 W
<b>Fuse protection</b>	8 A
